"Conceptual Narrative: Mixed Media from the Chodorkoff Collection" at FAU's Wimberly Library, 777 Glades Road, Boca Raton; 8 a.m. to midnight; free; 561/297-3770 or www.library.fau.edu

Since 2007, Bernard Chodorkoff and his wife Joan, both retired clinicians in the realms of psychology and psychiatry, have been gifting their extensive art collection to Florida Atlantic University. And now through Jan. 31, visitors to the university’s library will be able to feast on the doctors’ cultural tastes. The Chodorkoffs’ 120 mixed-media works include pieces in glass and fiber; and ceramics, paintings, sculptures and prints by titans such as Dale Chihuly, Ed Rossbach, William Morris and Clifford Rainey. The conceptually meaningful selections are connected by what the Chodorkoffs see as their ability to comment on social and personal relationships through the use of symbolic imagery.
